## SKILLS

## WORK EXPERIENCE

### Senior Developer

Phuel Strategies | Aug 16

Assists a variety of organizations with technology and marketing support. In addition to being available to clients for technology assistance. Tasked with developing new web sites and web applications for small businesses, non-profit organizations and individuals. Designs logos, social media ads, infographics, newsletters, and a variety of other marketing materials.

### Web Developer

Augeo Affinity Marketing | Jul 15

Team member tasked with redesigning the flagship rewards application from the ground up utilizing MVC ideology, a REST api, and a new content management system. Helped integrate a Classic ASP application into the flagship application. In charge of redesigning internal applications. Maintain old applications and build systems.

### Lead Developer

Swick Solution | Mar 15 - Aug 16

Develop web sites and web applications for small businesses, non-profit organizations and individuals. Design logos, social media ads, infographics, newsletters, etc. Advise clients on how to begin creating an online/social media presence. Selected Clients: SkyCloud IT, Rickardo Andre Lewis Art, Julianne Q Music, and Tau Beta Sigma - Zeta Alpha

### Web Application Development Specialist

Student Affairs Information Technology, Illinois State University | May 14 - Jun 15

Created applications from scratch (front-end, back-end and database design) for our customers and adapted them to fulfill all of the client's requirements. Converted older applications on Fusebox and .NET to CodeIgniter 2. Selected Projects: Conference Registration System, Volunteer Registration System, Student Employee Manager, Student Program Manager

## VOLUNTEER EXPERIENCE

### Chief Technology Officer

Midwest Institute for Sexuality and Gender Diversity | Mar 16

Design, develop and maintain all websites and applications for both the Institute and the Institute's products (i.e. MBLGTACC). Create strategic plans for reaching a broader audience in the Midwest through technology and social media. Create project plan documents before developing applications and document the resulting API. Lead a remote team of developers. Create cost-benefit analysis of tools to determine if they should be utilized or created in-house.

### Director of Marketing and PR

MBLGTACC | Nov 12 - Feb 15

Launched a social media campaign focused on college-aged LGBTQIA identified students which reached a following of 1,500 users on Facebook. Created and distributed all press releases for local media channels and publications. Developed a responsive website from scratch. Co-Created an eighty-page program book for all 2,400 attendees. Developed an application to present the twitter feed on screen, while giving us the ability to filter out tweets based on a tweet's content.
